

Judicial Department
FY 2016-17 Performance Plan
July 1, 2016

Trust in the rule of law distinguishes our society from many others around the world. The legitimacy of government depends on the fair, impartial, and reliable administration of the laws. Courts serve the people of the state by resolving disputes, protecting individual rights, and delivering justice in criminal and civil cases. To ensure a just society, courts must tailor the fair, effective, and efficient delivery of justice to fit each individual case.

For citizens to trust the judicial system they must believe that justice is truly for all. The courts are a fundamental government service and should be easily accessible by the public.

Mission

The Colorado Judicial Department, comprised of our state Courts and Probation Services, provides a fair and impartial system of justice that:

- **Protects constitutional and statutory rights and liberties;**
- **Assures equal access;**
- **Provides fair, timely and constructive resolution of cases;**
- **Enhances community welfare and public safety;**
- **Supervises offenders; and**
- **Facilitates victim and community reparation.**

STATUTORY AUTHORITY: The statutory authority for Colorado's Courts is at Article VI, Colo. Const. and §13-4-101, C.R.S.; and for Probation Services is at 18-1.3-201 and 18-1.3-202.

Major Functions of the Department

COLORADO SUPREME COURT

The Colorado Supreme Court is the state's court of last resort. Decisions are binding on all other Colorado state courts. The Supreme Court is composed of seven justices who serve ten-year terms, and the Chief Justice is selected from the membership of justices. The Chief Justice also serves as the executive head of the Colorado Judicial System and is the ex-officio chair of the Supreme Court Nominating Commission. The Chief Justice appoints the Chief Judge of the Court of Appeals and the Chief Judge of each of the state's 22 judicial districts and is vested with the authority to assign judges (active or retired) to perform judicial duties.

Requests to review decisions of the Colorado Court of Appeals constitute a majority of the Supreme Court's filings. The Supreme Court also has direct appellate jurisdiction over cases in which a statute has been held to be unconstitutional, cases involving decisions of the Public Utilities Commission, writs of habeas corpus, cases involving adjudication of water rights, summary proceedings initiated under the Election Code, and prosecutorial appeals concerning search and seizure questions in pending criminal proceedings. All of these appeals are filed directly with the Supreme Court, and, in these cases bypass the Court of Appeals. The Supreme Court also has exclusive jurisdiction to promulgate rules governing practice and procedure in civil and criminal actions.

Colorado's attorneys are licensed and disciplined by the Supreme Court. The court's attorney regulation system, funded by attorney registration fees, polices the profession. In addition, the court oversees the State Court Administrator, Board of Continuing Legal Education, Board of Law Examiners, Commission on Judicial Discipline, and Unauthorized Practice of Law Committee.

COLORADO COURT OF APPEALS

The Colorado Court of Appeals is the state's intermediate appellate court and consists of 22 judges who serve eight-year terms. The Court sits in three-member divisions to decide cases. The mission of the Court of Appeals is to provide the citizens of Colorado with clear, impartial, and timely resolutions of appealed orders and judgments as provided by law. The Court of Appeals has initial jurisdiction, with exceptions, over appeals from the Colorado District Courts, Denver Probate Court, and Denver Juvenile Court. In addition, the Court of Appeals has appellate jurisdiction over decisions originating from a number of state administrative boards and agencies. Reviews of the Court of Appeals' decisions are directed to the Colorado Supreme Court.

COLORADO TRIAL COURTS

Established pursuant to Article VI of the Colorado Constitution, Colorado's state trial courts consist of county courts, district courts, and water courts.

Colorado's district courts serve citizens of each county in the state. There are currently 181 district judges serving Colorado's 22 judicial districts. District judges preside over felony criminal matters, civil claims in any amount, juvenile matters (including adoption, dependency and neglect matters, juvenile delinquency, and paternity actions), probate, mental health, divorce proceedings, and water cases. Additionally, district judges handle appeals from Colorado municipal and county courts, and review decisions of some administrative boards and agencies.

Colorado's county courts serve the citizens of each county in the state as well. County judges handle cases involving serious public safety issues such as misdemeanor cases, felony advisements, setting bonds, and preliminary hearings. There are 114 county court judges. County judges also issue restraining orders in cases involving domestic violence arrest, issue search warrants, and preside over traffic cases and civil actions involving no more than \$15,000.

The Water Right Determination and Administration Act of 1969 created seven water divisions according to drainage patterns of various rivers in Colorado. Each water division is staffed with a division engineer, appointed by the state engineer; a water judge, appointed by the Supreme Court; a water referee, appointed by the water judge; and a water clerk, assigned by the district court. Water judges are district judges appointed by the Supreme Court and have jurisdiction in the determination of water rights, the use and administration of water, and all other water matters within the jurisdiction of the water divisions.

PROBATION SERVICES

Adult and juvenile probation services are provided in all of Colorado's 22 judicial districts. This includes 23 probation departments with over 50 separate probation offices throughout the state. Colorado Probation is committed to public safety; victim and community reparation, through offender accountability; skill and competency development; and services to the communities of Colorado. The Division of Probation Services (DPS) collaborates with local probation departments, courts and stakeholders to facilitate system improvement. DPS promotes learning and skill development, and provides customer support to improve knowledge, research application, and probation effectiveness.

OFFICE OF THE STATE COURT ADMINISTRATOR

Colorado Courts and Probation, with more than 300 judges and 3,500 support staff members, is centrally administered by the Chief Justice of the Supreme Court. To assist the Chief Justice, the Supreme Court appoints the State Court Administrator (SCA). Each of the State's 22 Judicial Districts also has a District Administrator and a Chief Probation Officer, and each of the 64 counties has a Clerk of Court.

The State Court Administrator's Office (SCAO) provides administrative support and services to the trial and appellate courts to assist them in providing the citizens of Colorado meaningful, speedy and economical forums to resolve disputes. It also supports the management of probation services to enhance public protection and offender rehabilitation.

In executing its constitutional and statutory duties, the office has the following functions: to provide administrative and technical support to the appellate courts, trial courts and probation; to provide centralized policy guidance; to develop and implement standards and guidelines; to serve as an advocate in obtaining necessary resources from the legislature; to provide services in an accurate, timely and equitable manner. Innovative business processes and technologies are constantly under evaluation for possible introduction throughout the Department in order to improve efficiency and to make the courts more accessible to the citizens of Colorado.

Principle Strategies and Goals

PRINCIPLE 1: Provide equal access to the legal system and give all an opportunity to be heard.

Barriers to access range from difficulties navigating within the court and probation facilities to a lack of information on obtaining accommodations for people with disabilities or limited English proficiency to inadequate resources to assist self-represented parties with their procedural questions. Such barriers may compromise effective and meaningful access to the court system.

GOAL 1a. Identify and address barriers to effective participation.

GOAL 1b. Maintain safety in all court and probation facilities.

GOAL 1c. Assist self-represented parties.

PRINCIPLE 2: Treat all with dignity, respect, and concern for their rights and cultural backgrounds, and without bias or appearance of bias.

As Colorado's population continues to diversify, so does the population that participates in the court system. It is important that judges and judicial staff be aware of the values of a wide number of cultures, and, when appropriate, to make accommodations. Courts and Probation is working to ensure that the courts are free from both bias and the appearance of bias, meeting the needs of increasing numbers of self-represented litigants, remaining receptive to the needs of all constituents, ensuring that court procedures are fair and understandable, and providing culturally responsive programs and services.

GOAL 2a. Collect feedback from court users, victims of crime, and those on probation regarding their experience with court and probation services.

GOAL 2b. Train all court and probation employees in communication, cultural competency, and customer service skills.

PRINCIPLE 3: Promote quality judicial decision-making and judicial leadership.

Court practices and case management procedures should be as uniform as practicable to avoid confusion and uncertainty. Courts and Probation must provide ongoing professional development, education, and training to address many concerns including the increasing complexity of court practices and procedures and the incorporation of evidence based in court operations and interactions with the public. Maintaining professional excellence will promote public trust and confidence in the judicial system as a whole.

GOAL 3a. Employ effective case management strategies.

GOAL 3b. Incorporate evidence-based principles in judicial decision-making.

GOAL 3c. Employ accountability methods that ensure that court orders are being enforced and monitored.

GOAL 3d. Develop systems that assure court-appointed persons are providing quality services.

GOAL 3e. Train and educate judicial officers on an ongoing basis.

GOAL 3f. Implement professional development and leadership programs for staff.

PRINCIPLE 4: Implement quality assessments and community supervision of adult and juvenile probationers to demonstrably enhance public safety and respect for victim rights.

The Division of Probation Services strives to reduce offender recidivism through the application of the Eight Principles of Effective Intervention. Probation Services promotes accountability and responsiveness in its enforcement of the court's orders while affecting long-term behavior change in offenders.

GOAL 4a. Ensure the accuracy and efficiency of pre- and post-sentence assessments; and provide comprehensive assessment information to judicial officers to assist judicial officers in making more informed decisions, leading to improved and less costly outcomes.

GOAL 4b. Employ evidence-based practices in all applicable areas of probation.

PRINCIPLE 5: Cultivate public trust and confidence through the thoughtful stewardship of public resources.

In serving the people of Colorado, Courts and Probation must also exercise its constitutional and statutory authority and responsibility to plan for, direct, monitor, and support the business of the system and to account to the public for the system's performance. The fulfillment of this role is only possible when the other branches of government and the public have trust and confidence in the system. In order to retain that trust and confidence, the system must be accountable to the people it serves by providing a fair and open process, communicating clear and consistent expectations for all who participate in that process, and being good stewards of the resources appropriated to it for the fulfillment of its mission.

GOAL 5a. Utilize the most effective and cost-efficient methods to conduct the business of the courts and probation.

GOAL 5b. Employ new and enhanced technology solutions for managing judicial business.

GOAL 5c. Share information and data with other governmental entities and the public, while balancing privacy and security concerns.

GOAL 5d. Ensure transparency of court and probation services operations.

GOAL 5e. Maintain a strong and well-trained workforce.

Environmental Scan

The principal strategies and goals have been developed in an effort to identify and meet the challenges faced by the Colorado Courts and Probation in an ever-changing environment. Many factors impact the operations of Colorado's courts and probation, including:

- Increased number of self-represented parties
- Economic factors
- Population growth
- Changes in demographics
 - Aging population
 - Increased number of residents speaking foreign languages
- Increased reliance on technology

In order to gauge the level of perceived trust and confidence within the courts, the Department conducted a survey in every judicial district in the state from 2008 through 2015. The survey is a set of ten trial court performance measures developed by the National Center for State Courts that attempt to give court managers a balanced perspective on court operations. The purpose of the survey is to:

- (1) Rate the court user's perceptions of the courts accessibility and its treatment of court users in terms of fairness, equality, and respect;
- (2) Provide a general snapshot on how the public perceives access and fairness in the courts; and
- (3) Establish a baseline of information so that the courts can evaluate current practices and create plans for more improved and efficient court practices.

The following figures illustrate statewide survey results from 2012 and 2013, compared with 2014 and 2015:

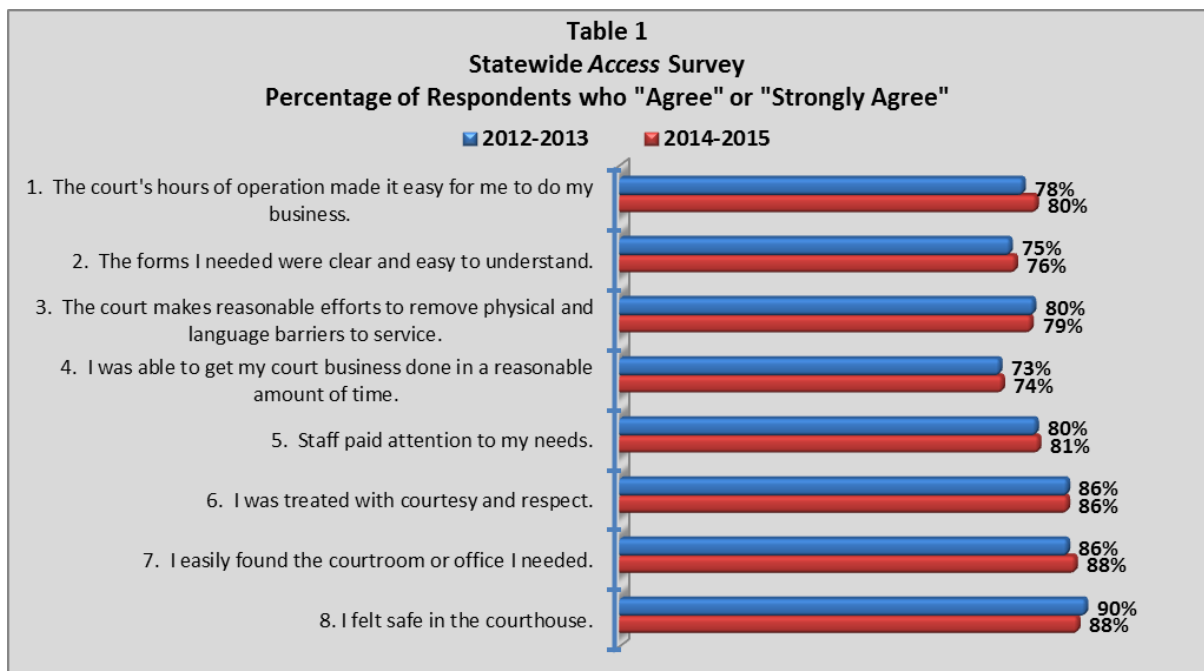

Table 2
Statewide Fairness Survey
Percentage of Respondents who "Agree" or "Strongly Agree"

Increased number of self-represented parties

One complicating factor in providing access to the court system is that a fairly dramatic shift has occurred over the past ten to fifteen years: citizens now generally expect to be able to fully participate in a court case without the services of an attorney. The court system, unfortunately, has struggled to keep up with the changing expectations and demand for providing services to self-represented parties, often referred to as pro se parties, particularly requests for one-on-one procedural assistance. The need for greater services to self-represented litigants has been expanded by the intersection of two forces: (1) a larger cultural shift in terms of a do-it-yourself society that proceeds through the court system without an attorney for either philosophical or economic reasons, and, (2) the fact that people who interact with the court system must be savvy in an increasingly internet-based justice system, which unfortunately has left many people far behind.

When an attorney is not involved in a case, more resources are required to process a case by court staff. Self-represented parties strain the court system in several respects. They: (1) increase the amount of time necessary for clerks to handle the day-to-day business of the courts and put stress on the workforce; (2) often file the wrong documents or incomplete documents; (3) fail to properly prepare for the hearing or trial and bring the necessary evidence and/or witnesses; (4) do not understand why the clerk’s office cannot provide free legal advice; (5) often are not computer literate, so simply giving them a website address of where the information is located is not always sufficient; (6) frequently don’t have the capacity to print documents necessary for their cases; and, (7) lack access to the necessary state statutes, court rules, and policies and procedures necessary to properly handle their cases.

In order to address this issue, the trial courts across the state have recognized that ultimately it is the court that must take leadership in addressing the procedural needs of self-represented litigants. By streamlining processes and providing informational resources, courts have become better situated to face the challenges related to self-represented litigants. Beginning in FY 2013, self-represented litigant coordinator positions were created to focus

solely on providing procedural support to self-represented litigants. As of FY 2015, every judicial district has at least a part-time employee to help address the needs of self-represented litigants at the local level. In 2015, the self-represented litigant coordinators responded to approximately 136,690 contacts from court users. More than half of the contacts in 2015 were related to domestic relations matters (54 percent). Given the complex nature of these cases, the assistance provided can be more involved and on-going as these matters frequently have post-decree activity. County civil and probate matters were the second and third most frequent case types self-represented litigant coordinators assisted litigants with based on the 2015 contact data. The 2015 trial court staff weighted caseload study included self-represented litigant coordinators in the study for the first time. The workload model developed from the study indicates a need for an additional 22.0 self-represented litigant coordinator FTE statewide. Both the contact data and workload modeling of self-represented litigant coordinators demonstrate the provision of assistance to parties without attorney representation continues to be a significant demand on the trial courts.

Economic Factors

During periods of economic change, the courts see changes in the types and numbers of certain case filings. For example, as the housing market has improved, the number of foreclosures has decreased. However, economic challenges in certain sectors have contributed to an increased number of tax liens in district court. The change in the number of these case types is illustrated below in Table 3:

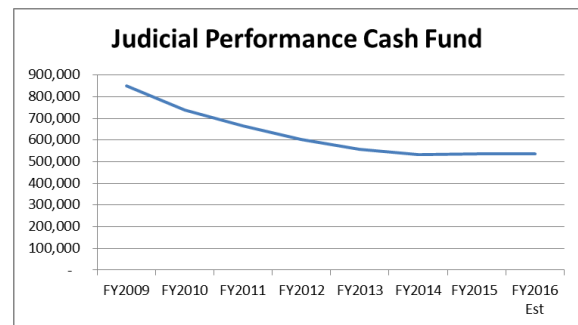

Table 3. Foreclosures and Tax Liens, FY 2004 to FY 2015

Case Type	Year Case Filed		Change
	FY 2004	FY 2015	
Foreclosures (Rule 120s)	21,696	8,165	(62%)
Tax Liens (distrain warrants and liens)	8,232	70,180	753%
Total District Court Cases	183,512	216,073	18%

These are also the case types that produce much of the revenue to Courts have come to rely on to fund basic operations over the past decade. During economic downturns, Court appropriations came to rely more heavily on filing fees. As the economy improves, these cases have begun to decline, putting significant strain on the Department’s finances. As this trend continues, cash funded programs have begun to restrict expenditures (i.e. Courthouse Security, Family Friendly Courts) or are now needing general fund help to maintain program operations (i.e. Judicial Performance).

In addition, as more Counties move to the Model Traffic Code, thereby diverting traffic cases from State Courts, cash funds whose primary source of revenue is traffic cases have been in decline for several years:

Population growth

Between 2000 and 2015 Colorado’s population increased 25 percent, according to the Department of Local Affairs. By 2020, the state’s population is expected to increase another 9 percent. Rapid population growth often places pressure on civic institutions, and Colorado’s courts are not immune from this pressure.

Changes in demographics

This dramatic growth in overall population has been accompanied by noticeable changes in the state’s demographics. These include: a continued aging of the state’s population, a sharp rise in the number of foreign-born citizens residing in the state, and an increase in not only the number of citizens speaking foreign languages but in the diversity of languages spoken as well. These demographic changes have a variety of impacts on the operations of Colorado’s courts and probation.

Aging population

Colorado has seen significant changes in the age of its population over the last decade. For the first time in Colorado history, the number of Coloradoans over 65 years of age has increased faster than the population of the state as a whole, growing by 32 percent from 2000 to 2010 (see Figure 1 below). Colorado experienced the 4th fastest growth in the 65+ population nationally between 2000 and 2010 (Department of Local Affairs State Demography Office, Aging in Colorado, July 2012).

Figure 1. Population Change by Age

Source: Department of Local Affairs State Demography Office, Aging in Colorado, July 2012

Nationally, approximately 13 percent of the U.S. population was over age 65 in 2010. With increased life expectancy and the aging of the baby boom generation in America, this segment is projected to account for 20 percent of the total population by the year 2030. As the population ages, the courts expect to see increases in case types such as probate and protective proceedings (i.e. guardianships and conservatorships). Unlike some types of court cases, which can be resolved in a year or less, many protective proceedings cases require long-term oversight by the courts. While approximately 2,700 protective proceedings cases were filed in FY 2015, more than 16,000 protective proceedings cases were subject to annual reporting requirements monitoring by the courts as of November 2015. Half of these cases had been monitored by the courts for more than 5 years and a quarter of the cases had been under court monitoring for 10 or more years.

Probate filings have steadily increased in the last few years. New probate case filings, protective proceedings and decedent's estates combined, are up 37 percent just since FY 2009.

Foreign languages

Colorado's foreign-born population more than doubled since 1990. By 2011, approximately 500,000 or 10 percent of the state's population was foreign-born.¹ Compare this percentage to 1990 when only 4.3 percent of Colorado's population was foreign-born. Much of this increase is due to Hispanic and Asian immigration.

¹ Source: U.S. Census Bureau, 2008 American Community Survey, C05002, "Place of Birth by Citizenship Status" and C05005, "Year of Entry by Citizenship Status," accessed October 2009.

According to the census data, the number of people in Colorado with limited English proficiency (LEP) has grown dramatically over the last twenty years—up 26 percent since 2000 and up 88 percent since 1990. The percentage of Colorado’s population speaking Spanish as the primary language at home increased from 6.7 percent in 1990 to 10.5 percent in 2000 to 12.1 percent in 2008. These figures are consistent with the increase in the state’s Hispanic population, as reported in the decennial census, which indicates that the percentage of residents identifying themselves as Hispanic grew from 12.9 percent in 1990 to 20.7 percent in 2010.²

Language and cultural barriers can create other obstacles such as misconceptions about the role of the court system and law enforcement. These challenges can create significant barriers for LEP litigants that can keep them from participating fully in their own court proceedings. In addition, they can result in the misinterpretation of witness statements to judges or juries during court proceedings and can deter minority litigants from using the civil justice system as a forum to address grievances. These concerns coupled with the growth in the LEP population amplify the significance of court interpretation and translation as management issues for the trial courts, which are increasingly compelled to use language interpreters in court proceedings and translators for written documents. This need is illustrated by the FY 2015 budget request for additional resources related to language access.

The need for interpreter services adds another set of variables in the case management efforts of the state’s trial courts. Additional time is required to determine the need for interpreter services, to schedule the appearance of interpreters, to conduct proceedings using interpreter services, and to process payments for interpreter services. Further, if an interpreter is not available or does not show up to a hearing, proceedings must be delayed. These factors can add significantly to the time required to resolve cases.

Increased reliance on technology

The Department has become increasingly reliant on technology to process the large volume of paper associated with trial court and probation cases. The case management systems for courts, probation and financial services (i.e. ICON/Eclipse/JPOD) integrate with applications from other agencies and departments. These systems have been a critical mechanism in maintaining public service levels while reducing the need for additional resources.

The Department launched an in-house Public Access system (PAS) in 2010. Revenue raised from fees charged for public access to court data is now exclusively funding the PAS. In addition, the fees charged for public access helped fund the development of the new in-house e-filing system (Integrated Colorado Courts E-Filing System, ICCES). Development of ICCES began in 2011. All civil, domestic, water, probate and appellate cases throughout the state are now filed online. The Department is currently transitioning criminal cases to e-filing. Sixteen of the 22 judicial districts have e-filing for criminal cases. The ability for citizens, lawyers, and district attorneys to e-file court documents improves access to the court system and helps make the courts more efficient.

² The census data indicates that there has also been growth, although not as large, in persons speaking Asian and other non-English languages.

Management Strategies and Measurements

TRIAL COURTS

New Case Filings

While total trial court filings have declined in the last year, the decrease has not been uniform. Some significant case types have increased over the past year, including criminal (both felony and misdemeanor), mental health, probate, and traffic cases (see figures below). As noted earlier, the last decade has also seen a considerable increase in case types that are most directly influenced by economic pressures, such as district court civil cases that include foreclosures and tax liens (see Table 3 on page 8).

Trial Court Management Strategies

In managing its limited resources, the Department has focused on making the courts accessible to the public, ensuring that cases are resolved in a timely manner, and assisting individuals with navigating the court system. To achieve these goals, the Department in recent years has requested and received resources related to public access and the efficient and effective operation of the court system. These resources include: (1) language interpreters who help individuals who do not speak English as their primary language access the courts and understand the court process; (2) family court facilitators to improve the public’s access to Domestic Relations court proceedings, expedite the processing of cases involving the dissolution of marriage and parental responsibility disputes, and provide early, active, and ongoing case management; and (3) self-represented litigant coordinators who provide self-represented litigants with the information they need to proceed with their cases, thereby increasing citizen access to justice and allowing for more streamlined case processing.

Performance goals for trial courts have been established through various means, including Chief Justice Directive 08-05 (Case Management Standards). This directive was developed with input from judges and establishes aspirational time processing goals for each case class. Information about each district’s progress in meeting the goals is reported quarterly. Information for individual judges is provided to the Judicial Performance Commission during each judge’s retention evaluation. The following tables reflect the time standards for district and county courts:

TABLE 1			
District Court Case Management Time Standards			
Established Pursuant CJD 08-05			
Case Class	Pending Cases Exceeding Target		Target
	4th Quarter FY 2015	3rd Quarter FY 2016	
Civil	12.13%	10.78%	No more than 10% of cases open more than one year.
Criminal	4.57%	4.26%	No more than 5% of cases open more than one year.
Domestic Relations	3.11%	3.42%	No more than 5% of cases open more than one year.
Juvenile Delinquency	2.11%	2.17%	No more than 5% of cases open more than one year.
Dependency and Neglect (over 6 years old)*	3.32%	2.26%	No more than 5% of cases open more than 18 months
Dependency and Neglect (under 6 years old)*	7.23%	4.25%	No more than 10% of cases open more than one year.

* The standards in dependency and neglect are under review. This measure shows time to first permanency hearing. A more optimal measure would be time to true permanent placement or termination of court jurisdiction.

TABLE 2			
County Court Case Management Time Standards			
Established Pursuant CJD 08-05			
Case Class	Pending Cases Exceeding Target		Target
	4th Quarter FY 2015	3rd Quarter FY 2016	
Civil	7.16%	4.62%	No more than 5% of cases open more than six months.
Misdemeanor	13.54%	14.69%	No more than 10% of cases open more than six months.
Small Claims	3.84%	3.46%	No more than 1% of cases open more than six months.
Traffic	6.29%	7.15%	No more than 5% of cases open more than six months.
DUI/DWAI	14.62%	13.87%	No more than 20% of cases open more than seven months.

PROBATION SERVICES

In the last ten years, Probation has experienced a number of changes. There has been significant growth in the number of adults sentenced annually to Probation: from 22,115 in FY 2005 to 51,235 in FY 2015. The number of individuals on active supervision on June 30 of each year has increased from 47,104 in 2005 to 77,916 in 2015. During that same period, there has been a steady decline in the number of juveniles sentenced annually to probation: 6,543 in FY 2005 to 3,978 in FY 2015. There has also been a shift in the number of felony versus misdemeanor convictions and sentences to probation. In FY 2005 the percentage of new cases sentenced for a felony offense was 58 percent; in FY 2015 it was 28 percent. This shift in offense level is not an indicator of reduced risk to reoffend amongst probationers. Rather, it is largely a reflection of statutory changes, particularly in the area of drug crimes and alcohol related driving offenses. Other changes include increases in the percentage of female defendants and a decrease in the percentage of the probation sentences for individuals between the ages of 18-24 and a corresponding increase for those between the ages of 25-40+.

Over this ten-year period of time, Probation has continued to work to identify and utilize assessments, processes and programs that uphold public safety, are cost effective, and increase positive outcomes. There is a continued focus on the identification and implementation of evidence-based practices (EBP) and principles. To be considered an EBP a program or practice has undergone significant research rigor and, if implemented correctly, will deliver improved outcomes. This effort is consistent with the principles of evidence-based decision-making and supports the approach of working with individuals on the basis of their unique needs.

Going into FY 2017, Probation is collectively staffed at 90 percent of need (96 percent probation officer, 75.2 percent support staff, and 80.4 percent supervisors). Probation supervisors play a vital role in the effective implementation of evidence-based practices and principles through quality assurance practices, performance feedback, and coaching. Tending to the daily management of their units contributes to the overall management of the department, a fundamental need of every organization. For these reasons, Probation’s three-year plan is to increase staffing levels of supervisors to 100 percent while maintaining current levels for probation officers and support staff. As illustrated in the tables below, the total FTE need over three years is 72 staff (supervisors, probation officers and support staff).

Allocations & Projected Requests (in FTE)								
	FY2014	FY2015	FY2016	FY2017	FY2018	FY2019	FY2020	FY2018- FY2020
Regular PO's (sup & PSI; adult & juvenile)	2.25	0.0	1.79	.95	0.0	25.0	0.0	25.0
Intensive PO's (adult & juv)	0.0	0.0	0.0	0.0	0.0	0.0	0.0	0.0

Support Staff	0.0	0.0	5.3	.23	5.0	2.0	0.0	7.0
Supervisor	1.0	3.25	20.3	.23	20.0	10.0	10.0	40.0
Total Appropriated FTE	3.25	3.25	27.39	1.41	25.0	37.0	10.0	72.0

Percent Staffed							
	FY2011	FY2012	FY2013	FY2014	FY2015	FY2016	FY2017
Regular PO's (Adult & Juvenile PSI's, Regular State & Intensive)	94.9%	97.7%	96.4%	96.6%	93.8%	96.5%	95.8%
Support Staff	78.7%	78.4%	76.9%	77.3%	73.2%	73.8%	75.2%
Supervisor	85.3%	75.9%	88.8%	89.1%	68.6%	83.1%	80.4%
Overall	91.0%	91.8%	92.1%	92.3%	87.3%	91.1%	90.5%

Probation success rates have decreased slightly in recent years. Each probation department receives quarterly reports with individual district success rates that allow them to monitor their progress throughout the year. Probation departments may request technical assistance and additional training to assist them in developing plans to improve their outcomes. While recidivism rates have declined in recent years and new crime and absconder rates have remained steady over the last five years, technical violations have accounted for the majority of increase in probation failures. A new program, Strategies for Behavior Change (SBC), is currently being implemented statewide. The program is designed to address technical violations and impact short and long-term behavior change for all probation populations. As it will require several years for the entire state to reach full implementation of this programming, it will also take a number of years to measure the impact of the program on success and recidivism rates.

*Due to the smaller number of probationers in some intensive programs, the actual success rate may experience drastic fluctuations. Adult ISP began transitioning populations in FY2014 to include LSIP (high risk/low need probationers) and to move low risk and/or high need probationers to other programming.

Probation Management Strategies

To maintain and improve current levels of success Probation continues to pursue the goal of full staffing and to aggressively work to implement applicable evidence-based programs and practices, training and skill development. Probation’s current efforts to improve outcomes include the following:

- The Colorado Juvenile Risk Assessment (CJRA) was fully implemented in February 2013 but was not automated in Judicial’s case management system (ICON/Eclipse) until FY 2016. During the second half of FY 2016, regional CJRA booster trainings were conducted, which included instruction on the use of the newly automated system.
- The juvenile sex offender assessment instrument was replaced by the research-based Juvenile Sex Offender Assessment Protocol (JSOAP) in September 2013. Work is currently underway to program the assessment in Judicial’s case management system (ICON/Eclipse). In the last half of FY 2016, a JSOAP booster training was offered to refresh the skills of trained officers and enhance interrater reliability.
- A review of the fidelity to assessment and case plan training indicated the volume of information new probation officers were required to absorb during the Probation Academy and put into practice upon return to the department was extreme. In 2015 the DPS training unit developed an Assessment and Case Plan 101 training to be delivered to new probation officers within 30 days of employment and prior to their attendance at the Probation Academy. New probation officers then received level 102 training during the Academy. Early indications have shown this has been a much more effective method and training retention is much higher. Assessment and case planning are essential base skills new probation officers must master as they are critical to the evidence-based practice improvements underway in probation. During FY 2016, 46 probation officers were trained in a new cognitive-behavioral intervention

program, MRT (Moral Reconciliation Therapy). This training will allow officers to facilitate groups in their local jurisdictions, as well as working individually with probationers.

- Created in 2014, Limit Setter Intensive Probation (LSIP) is the most intensive level of probation supervision, which was designed specifically for the higher risk/lower needs population representing a type of offenders who are career criminals. A process evaluation has been completed, which measured the fidelity to the new program's case management components. As a result of the evaluation, technical assistance, coaching, and training have been conducted in local jurisdictions to improve fidelity to the supervision model.
- The development of offender typologies (a reflection of common characteristics of a group of probationers) and evidence-based supervision strategies was initiated for the adult probation population. At the end of FY 2016, an analysis was begun of Probation's total population. This analysis will be used to formulate the typologies and inform the development of programming to address the risk and needs of each typology.
- Development of a structured decision-making process for responding to violation behaviors and reinforcing positive behaviors with the goals of harm reduction, improved success and long-term behavioral change has been completed. Known as Strategies for Behavior Change (SBC), this process was piloted and a process evaluation has been completed, which indicated strong fidelity to the (SBC) model. Statewide implementation has begun, with an anticipated completion date in January 2019.
- In addition to the required training delivered statewide by the Training Unit in the Division of Probation Services, skill training is being delivered for the new evidence-supported programs and practices mentioned throughout this section. Included is the development of coaching skills for supervisors so they are able to increase support and effective implementation of best- and evidence-based practices.
- Judicial trainers have researched and adopted the Kolb's Learning Styles model of instruction and are developing experiential learning modules for classes. These approaches are designed to give training participants a more rounded approach to learning and to increase content retention and skill development.
- Monthly publication and distribution of *Research in Brief* to all probation departments continues. Relevant criminal justice research is reviewed and summarized on a single page with a focus on providing enhanced understanding of current research and practical tips for application in probation. This publication has achieved a national following.
- Performance feedback efforts continue including quarterly statistical reports summarizing progress toward reaching improved outcomes for all probation programs/populations, the statewide results of which are in the table above.
- The Rural Initiative program continues to facilitate the training and state approval of domestic violence, sex offender and substance abuse treatment providers in rural counties. This effort is intended to provide quality treatment "close to home" for probationers who would otherwise be required to travel significant distances to secure treatment. This project has reduced technical violations and improved treatment compliance. The initiative is supported by offender pay cash funds.
- A variety of mechanisms to monitor low-risk probationers in a cost effective manner that creates increased time to be devoted to the management of higher risk offenders' supervision without the loss of accountability for a large segment of low risk probation population are utilized. Examples include telephone reporting for low risk clients and daily reporting requirements for the highest risk populations and the development of large low-risk only caseloads and smaller higher-risk only caseloads.

- A workload value study is conducted every five years. The most recent study identified workload values for officers reflecting the implementation of evidence-based practices and principles. The work of probation supervisors, the linchpins to EBPs, was also evaluated in an effort to develop an adequate supervisor to staff ratio (i.e. span of control). Additionally, a ratio of support staff to probation staff was reviewed. Individuals in all three job categories play an important role in the efficient and effective implementation of evidence-based practices.
